Directorate-General Regional and Urban Policy Analysis Unit B1

February 2015

### Introduction

The Analysis unit of DG for Regional Policy has created 28 country fact sheets to support the preparation and negotiations for the programming period 2014-2020. Each factsheet makes it easy to compare the performance of a country with the EU average and the best and the worst performer in the Union.

It shows indicators at the national level, grouped by the three types of growth, and the regional level. In addition, it shows the distribution of population by type of region and a few indicators by degree of urbanisation, which highlight the differences between cities and rural areas.

The Europe 2020 indicators are highlighted in blue. They show the current level, the target, the distance to the target and recent change. The distance to target shows how far a country is removed from the target it has set itself. This distance can be compared to the EU distance and the shortest and longest national distance. Comparing the distances should provide an indication of the relative effort required to reach the target. Where available and reliable, regional Europe 2020 indicators have been included.

These fact sheets are based on data primarily from Eurostat, but also from the Joint Research Centre, the European Environmental Agency, the World Bank and other sources. The targets have been collected from official documents. In some cases, absolute targets have been translated into relative targets to allow for a cross country comparison.

### Table of contents

- 1. NATIONAL INDICATORS
- 1.1. Smart Growth
- 1.2. Sustainable Growth
- 1.3 Inclusive Growth
- 1.4. Context indicators
- 2. REGIONAL INDICATORS
- 3. POPULATION IN SPECIFIC TERRITORIES
- INDICATORS BY DEGREE OF URBANISATION
- 5. SOURCES AND NOTES

Comments on these fact sheets are welcome at REGIO-PAPERS@ec.europa.eu

### **Explanation of the column headings**

M.S.	EU avg.	EU min.	EU max.
Member State value	EU value	Minimum national value in the EU	Maximum national value in the EU

# 1. National Indicators

R&D and Innovation  R&D expenditure	indicator	unit	year(s)*	M.S.	EU avg.	EU min.	EU max.

Share of renewable energy in gross final energy consumption

Share of renewable energy in gross final energy % of energy consumption Eurostat

consumption - national EU 2020 target Eurostat, DG REGIO

Share of renewable energy in gross final energy % of energy consumption consumption - increase required to reach the target

Share of renewable energy in gross final energy Percentage point change Eurostat, DG REGIO consumption - change in rate

Wind energy potential full load hours per year EEA ETC-ACC, REGIO-GIS

Average full load hours per year (onshore only) at 80 m hub height.

Average solar energy resources in KWh/year Average of solar radiation resources JRC (Photovoltaic Geographical

Information System), REGIO-GIS

European Environment Agency

Eurostat

Regional, national and EU averages of raster data representing the yearly sum of global irradiation on optimally-inclined surfaces (KWh/m²), during period 1981-1990.

**Environment** 

Population connected to urban wastewater treatment Eurostat % of total population

Particulate matter (PM10) annual average EEA, Eurostat, REGIO-GIS μg/m<sup>3</sup>

Figures at regional, national and EU level are population weighted averages of raster-based concentration values.

EEA, Eurostat, REGIO-GIS Ozone concentration exceedances (> 120 µg/m3) Annual average of number of days with

exceedance

Days with ground-level ozone concentration above 120 μg/m³. Population-weighted aggregated values at regional/national/EU level.

Sufficiency of sites designated under the EU habitats % of suficiency of proposals Eurostat

directive

This index measures the extent to which SCI proposed by the MS cover the species and habitats listed in Annexes I and II to the habitats directive. 100% indicates sufficiency of proposals for all Annex I and II terrestrial habitat types and species.

**Transport** 

Density of motorways Eurostat, EuroGeographics, DG Index of length, relative to area and population

MOVE, NSOs, REGIO-GIS

Arithmetic average of the index relative to area (motorway length / surface) and the index relative to population (motorway length / inhabitants), both indices being expressed in comparison to the EU28 average.

Increase in pot. road accessibility in a high-speed scenario % increase in current pot. accessibility DG REGIO, Spiekermann & Wegener

Potential (pot.). accessibility calculates the inverse-distance weighted population that can be reached within approximately four hours travel time. The high-speed scenario assumes an ample provision of motorways.

Passenger transport by road Eurostat % of passenger km per mode % of tonnes km transported per mode Freight transport by road Eurostat

Road fatalities per mio inhabitants DG MOVE+ENER-SRD, CARE

database; Eurostat

COM(2010) 389, Towards a European Road fatalities - European 2020 target per mio inhabitants

road safety area

DG REGIO Road fatalities - reduction required to reach the target per mio inhabitants

DG REGIO, RRG Density of railways (moderate and high speed) Index of length, relative to area and population

Arithmetic average of the index relative to area (railway length / surface) and the index relative to population (railway length / inhabitants), both indices being expressed in comparison to the EU28 average.

Increase in pot. rail accessibility in a high-speed scenario DG REGIO, Spiekermann & Wegener

Potential (pot.). accessibility calculates the inverse-distance weighted population that can be reached within approximately four hours travel time. The high-speed scenario assumes an ample provision of reasonably fast rail connections.

% of passerger km per mode Furostat Passenger transport by rail

Freight transport by rail % of tonnes km transported per mode Eurostat

Accessibility to passenger flights Daily number of passenger flights Eurostat, JRC, EFGS, TomTom,

EuroGeographics, REGIO-GIS

Regional population-weighted average number of passenger flights per day, accessible at less than 90 minutes travel time by road.

**Employment** 

**Employment growth** Average annual % change Eurostat, DG REGIO

Growth of workplace-based employment (regional and national accounts)

Eurostat and NSOs Employment rate, ages 20-64 % of population, aged 20-64 Employment rate, ages 20-64 - national EU 2020 target % of population, aged 20-64 Eurostat, DG REGIO

Employment rate, ages 20-64 - increase required to % of population, aged 20-64 Eurostat, DG REGIO reach the target

Employment rate, ages 20-64 - change in rate Percentage point change

Eurostat Change in the employment rate of persons aged 15-64

Gender gap in employment rate, ages 20-64

% point difference (f - m) Eurostat

The difference between female and male employment rates

% of active population Eurostat and NSOs Unemployment rate Change in unemployment rate Percentage point change Eurostat and NSOs

Gender gap in unemployment rate % point difference (f - m) Eurostat
