

20 Απριλίου 2018

During the celebration of the First GeoNight in Greece, and amongst the activities proposed in Athens:

- ❖ **At Harokopio University campus - Geography Department** (Kallithea- Athens), several workshops will give an insight into the multi-faceted approach and object of Geography, from 17.00 until 20.00, under the title **"Scribbling the earth / Depicting the earth"**.
- **The Eratosthenes Experiment** or How did Eratosthenes measure the circumference of the Earth.
- **Circular Economy:** Re-use - re-sourcing.
The Plastic Bag Monster
Your old T-Shirt - Your new cloth bag
- **Does the weather station forecast the weather?**
Operation principles of a weather station
Description of measurement data.
- **Athens Social Atlas:** The social profile of Athens (Greece) through a digital tool.
- **Palaeogeography: Sifting sediment.**
- **Geographical surprises !!! *Act and play !***

The GeoNight continues at the French School of Athens (EfA), Didotou, 6 Athens 106 80.
