An App that can spot-out in real time the Athens (since 2018) city areas that suffer most during the ongoing event of extreme temperature.

Through the mobile app, you receive a personalized heat stress risk for your current location and recommendations on measures to reduce your risk. The EXTREMA app provides navigation information, by foot or public transit, to the nearest cooling center and helps you choose the right one for you. The app supports multiple users. (2019-07-05)
